

# GYM MANAGEMENT SYSTEM

Presented by STAR LINK

# INTRODUCTION

Gym Management System developed by Star Link is an excellent solution for gyms with a large/growing number of members, or ones serving elite clientele. This solution is basically RFID and biometric-based which helps to identify the user and manage their timely memberships.

In its working, each member is issued a membership card (smart card) which is valid for a fixed number of gym sessions, or for a particular period of time (say 30 days), or a combination of the two (say 30 sessions in 45 days); totally based on the payment policy.

# GYM MANAGEMENT SOFTWARE

- > IDEAL FOR GYMS WITH A LARGE/GROWING MEMBER BASE.
- > BIOMETRIC & RFID-BASED SOLUTION FOR SEAMLESS ACCESS CONTROL.
- > TRACKS MEMBERSHIP VALIDITY (SESSIONS OR FIXED TIME PERIOD).
